

I consider all the bulls in this catalogue to be sound with 6 or better for feet and legs, user friendly temperament and be unique in the performance they have to offer.

### **Victoree Lingle VVW Y45**

(owned by Victoree)

- Absolute best genetics Victoree could create
- Bloodlines not available elsewhere
- Performance with pazazz
- Stayability at its best

Sit back, relax and grab yourself a bottle of Morrisons of Glenrowan recent release Durif, one the best local reds for succulent grass fed steak, ring Bob or Di on 03 57662734

### **The VERY full story**

Victoree Lingle comprised the efforts of 4 cattle breeders who committed a life time in the pursuit of excellence.

Victoree Lingle was by far the most impressive animal Victoree had produced. He combined the Victoree

The late Lin Sanderson owner of the Wallah Angus stud at Narrabri dreamt of Australia having a National

Both Harry and I had recently been to the US and thought Goodwill was the bull we needed to improve g

Goodwill sired some stand out females and a few exemplary sons, which sold for 4,000 - 22,500, 'stay in

We were so impressed with Goodwill we went back to Thologolong and purchased his sire Creekton Km

At the time we started doing feed conversion tests on the best looking four weaners we produced each y

During the early 70's American animal science professors started visiting Australia giving seminars, judg

Lingle's mother from the Eventune cow family is still today one of my favourite and one which exhibits gr

Harry decided to enter Lingle in the 1981 Royal Melbourne show as a yearling, he won the Junior Cham

Lingle was a bull with tremendous eye appeal, soundness, balanced muscle and pazazz. Fortunately we

When we sold Lingle we sold semen shares and the walking rights separately; and he netted \$22,500, h

The need for credible outcross genetics has never been greater and we won't be letting the semen go u

We bartered semen with Dave Crocker from Yea. His unique pure Australian bloodline herd –Bullamalit

To obtain 30-year-old pure Australian genetics with some performance measurements and proven show

**Bullamalita Kendrum CZW E46**  
(owned by Bullamalita Angus, Yea Victoria)

available in New Zealand

- Rare and outstanding bloodlines
- Excellent stayability frame 5
- Huge carcass quality potential off grass
- Proven old Hazeldean genetics

For many years I have been searching for outcross genetics, which I think could be usefully employed in  
Three years ago I heard of some yearling carcasses with marbling and followed the story through to Bulla

On top of this we know sixteen headlines have outcrossed from 50 fertility, 20 live weight, 20 outcrosses stayability and  
Her fifteenth calf scanned 8.2, the highest possible value. Kendrum himself at fourteen months scanned  
E46 is one of the best maturing outcrosses we've ever had but he's impossible to track. Don't Cardie

In the first week of April at Brown Mountain Angus at Bemboka his AI calves started arriving 12 days before

**Booroomooka Theo NGM T30**  
(owned by Agrigene)

- Proven one of Australians best all round performers
- Would compliment part of every herds breeding program
- Calving ease, calmness, quality carcass, stayability
- Outstanding longevity

In the middle 90s I was frustrated using imported bulls - They would have low birth weight in the US when I decided to focus my breedplan sorts on Australian bulls; easy calving, not extreme growth, positive fat, high milk production. Within a few days John Sambell from Ballangeich (near Geelong, Victoria) sold a red average Bonadon bull. Theo was in a group of sale yearlings and as soon as I saw him I knew this was the bull that the industry

Let me tell you about an old wives tale...

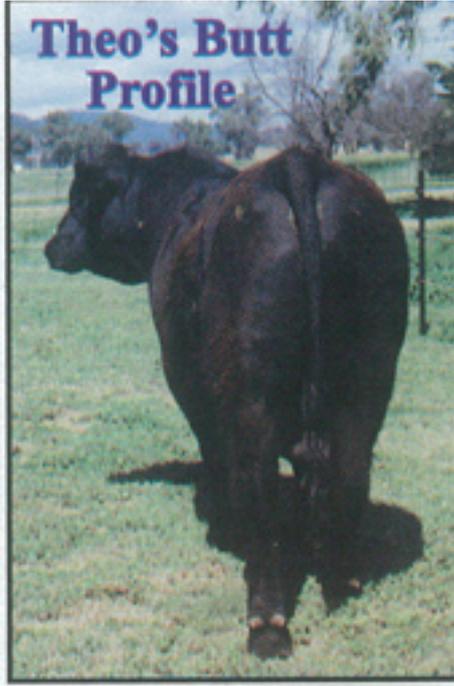

The old Scottish master Angus breeders, constantly talked about a "brown mossy" coat being a most desirable. For those who don't know, the Sutherland's were the carcass kings of the 50's and 60's blitzing most markets. So laugh all you like, but when I find Angus with fine brownish mossy coats I never walk past without investigating. Take a look at the yearling photo (middle right) of Theo in winter. He's really got it. As soon as we'd finished the sale well to cut a moderately long story short, Theo is the best all round bull that we've used in the last 15 years. This was the most semen I have ever sold in one package.

When your cows become fixig, box shaped, wirey bulls like Theo have probably have lower fertility than you think.

Theo has proved to be one of the outstanding maternal and carcass bulls in the famous Mt Linton herd in New Zealand (97% weaned, 6 week mating, only 4 assisted out of 440 heifers).
